

CSE2102 Introduction to Software Engineering (Spring 2024)

Please enter the full URL of your team's Lab1 solution (i.e., the class diagram) on the GitHub repo:

<https://github.com/srsampt/CSE2102-SP24-Lab1-Group40>

Evaluate each member in your team on a scale of **0 (no involvement) – 10 (excellent)** based on the following attributes

- **Participation:** How much interest the team member shows? How much motivated is he or she to get the work done? How about attendance in the team meetings and responsiveness in e-mails, etc.?
- **Contribution:** Does the member suggest solutions that lead to finishing the task? Does he or she finish the assigned work?
- **Timeliness:** Coming to meetings; finishing work on time; etc. Does he or she make you miss the milestone point(s) and/or the deadline?
- **Overall:** Is the member an asset to the team? Are you happy that he or she is in your team?

Evaluate yourself also. Add additional rows if necessary. Add comments at the bottom if desired. The table part is mandatory.

	Name	Participation	Contribution	Timeliness	Overall
1	Sarah (me)	10	10	10	10
2					
3					
4					
5					

Comments: I worked alone, hence why there is only one evaluation in my table. I gave myself a perfect evaluation because I know that I put a great deal of effort into this lab, and that I was very detailed and thorough with my work.

Name: Sarah Sampt
(Sign by typing your name above)

Date: 2/26/24

Upload your evaluation in PDF format to HuskyCT before 11:59pm, Monday (2/26/2024).
